Some of Our Products
Specialists in Shock, Vibration, and Noise Reduction

**CUP MOUNTS**
Isolates mechanical equipment and sensitive electronics from shock and vibration in defense applications.

**FAIL-SAFE COMPRESSION MOUNTS**
Vibration mounts for effective isolation of small to medium diesel engines, generators, recreational/off road vehicles, farm and construction equipment, motors, machinery, pumps, and compressors.

**RING AND BUSHING**
Popular mount used to isolate engines, radiators, motors, generators, and pumps in both stationary and mobile applications.

**HIGH-DEFLECTION MOUNTS**
High-input shock and vibration protection for sensitive electronics on mobile platforms.

**ALL-ELASTOMER MOUNTS**
Cost effective mounts that are fail-safe when installed with ordinary nuts and washers.

**CAN-STYLE MOUNTS**
Used for isolating sensitive electronics equipment for shipboard, aircraft and vehicular applications.

**LOW-PROFILE MOUNTS**
Used in limited space applications.

**CLDM DAMPING MATERIAL**
Designed to offer the maximum amount of structural damping to circuit boards and panel structures by shearing the highly damped viscoelastic layer.
